TCP/IP Network Administration (3rd Edition; O'Reilly Networking)

Craig Hunt

TCP/IP Network Administration (3rd Edition; O'Reilly Networking) Craig Hunt

This complete guide to setting up and running a TCP/IP network is essential for network administrators, and invaluable for users of home systems that access the Internet. The book starts with the fundamentals -- what protocols do and how they work, how addresses and routing are used to move data through the network, how to set up your network connection -- and then covers, in detail, everything you need to know to exchange information via the Internet. Included are discussions on advanced routing protocols (RIPv2, OSPF, and BGP) and the gated software package that implements them, a tutorial on configuring important network services -- including DNS, Apache, sendmail, Samba, PPP, and DHCP -- as well as expanded chapters on troubleshooting and security. *TCP/IP Network Administration* is also a command and syntax reference for important packages such as gated, pppd, named, dhcpcd, and sendmail. With coverage that includes Linux, Solaris, BSD, and System V TCP/IP implementations, the third edition contains:

- Overview of TCP/IP
- Delivering the data
- Network services
- Getting started
- Basic configuration
- Configuring the interface
- Configuring routing
- Configuring DNS
- Configuring network servers
- Configuring sendmail
- Configuring Apache
- Network security
- Troubleshooting
- Appendices include *dip*, *ppd*, and *chat* reference, a *gated* reference, a *dhcpcd* reference, and a *sendmail* reference

This new edition includes ways of configuring Samba to provide file and print sharing on networks that integrate Unix and Windows, and a new chapter is dedicated to the important task of configuring the Apache web server. Coverage of network security now includes details on OpenSSH, stunnel, gpg, iptables, and the access control mechanism in xinetd. Plus, the book offers updated information about DNS, including details on BIND 8 and BIND 9, the role of classless IP addressing and network prefixes, and the changing role of registrars. Without a doubt, *TCP/IP Network Administration, 3rd Edition* is a must-have for all network administrators and anyone who deals with a network that transmits data over the Internet.

From reader reviews:

Frank Barcomb:

The book TCP/IP Network Administration (3rd Edition; O'Reilly Networking) can give more knowledge and information about everything you want. Why must we leave a very important thing like a book TCP/IP Network Administration (3rd Edition; O'Reilly Networking)? A few of you have a different opinion about publication. But one aim this book can give many info for us. It is absolutely appropriate. Right now, try to closer along with your book. Knowledge or info that you take for that, you are able to give for each other; you are able to share all of these. Book TCP/IP Network Administration (3rd Edition; O'Reilly Networking) has simple shape however, you know: it has great and large function for you. You can look the enormous world by open and read a publication. So it is very wonderful.

Duncan Houghton:

The particular book TCP/IP Network Administration (3rd Edition; O'Reilly Networking) has a lot associated with on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. The writer makes some research just before write this book. This book very easy to read you can find the point easily after looking over this book.

James Voyles:

In this particular era which is the greater individual or who has ability to do something more are more important than other. Do you want to become certainly one of it? It is just simple solution to have that. What you should do is just spending your time little but quite enough to have a look at some books. On the list of books in the top collection in your reading list is TCP/IP Network Administration (3rd Edition; O'Reilly Networking). This book and that is qualified as The Hungry Inclines can get you closer in getting precious person. By looking up and review this book you can get many advantages.

Shane Dagostino:

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library or make summary for some guide, they are complained. Just tiny students that has reading's heart or real their passion. They just do what the teacher want, like asked to the library. They go to there but nothing reading very seriously. Any students feel that reading through is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this TCP/IP Network Administration (3rd Edition; O'Reilly Networking) can make you truly feel more interested to read.
