This key has been prepared for the California Botanical Club, and is published by that organization. The club was founded by Mr. and Mrs. Brandegee in 1891, and since then has been connected with the California Academy of Sciences. The key has been modeled from that prepared by the author for the Pacific Coast Edition of Bergen's Botany, published in 1897. Changes and some additions have been made which it is hoped are improvements. Appended are several lists of families classified by characteristics which they have in common. There is added a guide for the analysis and description of flowering plants which was prepared by the author for the club and published in 1897.
