## **History of Europe Our Own Times the Eighteenth and Nineteenth Centuries: The Opening of the Twentieth Century and the World War, James Harvey Robinson**

History of Europe Not only have the illustrations been carefully chosen with a view of corroborating and vivifying the text, but under each picture a sufficiently detailed legend is given to explain its significance, and this often adds materially to the information given in the letterpress. The pictures consequently give a sort of parallel narrative and furnish a helpful supplement and corrective to the text itself. Everything which does not obviously bear upon the chief matters under consideration is sedulously excluded. These volumes meet the growing demand for a two-year course in European history in the earlier years of the high school and in the preparatory schools. In Volume I the great achievements of the oriental peoples and of the Greek and Roman periods are brought into immediate relation with later European development, without devoting a whole year's study to them. English history, if somewhat briefly treated, is given its proper association with that of the neighboring nations on the Continent. By devoting the whole second year to the history of the tremendous changes which have overtaken the world since the middle of the eighteenth century, the student will be in a position to grasp the causes and results of the World War and the perplexing conditions in the midst of which we live. It will be observed that a half of the present volume a quarter of the whole work is assigned to the period since 1870; namely, our own times. J. II. R. C. A. B.
