Detection Estimation and Modulation Theory, Detection, Estimation, and Filtering Theory

Harry L. Van Trees, Kristine L. Bell

Detection Estimation and Modulation Theory, Detection, Estimation, and Filtering Theory Harry L. Van Trees, Kristine L. Bell

Originally published in 1968, Harry Van Trees's Detection, Estimation, and Modulation Theory, Part I is one of the great time-tested classics in the field of signal processing. Highly readable and practically organized, it is as imperative today for professionals, researchers, and students in optimum signal processing as it was over thirty years ago. The second edition is a thorough revision and expansion almost doubling the size of the first edition and accounting for the new developments thus making it again the most comprehensive and up-to-date treatment of the subject.

With a wide range of applications such as radar, sonar, communications, seismology, biomedical engineering, and radar astronomy, among others, the important field of detection and estimation has rarely been given such expert treatment as it is here. Each chapter includes section summaries, realistic examples, and a large number of challenging problems that provide excellent study material. This volume which is Part I of a set of four volumes is the most important and widely used textbook and professional reference in the field.

From reader reviews:

Veronica Mei:

Nowadays reading books become more and more than want or need but also work as a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the actual information inside the book which improve your knowledge and information. The info you get based on what kind of book you read, if you want send more knowledge just go with education and learning books but if you want sense happy read one using theme for entertaining for instance comic or novel. The actual Detection Estimation and Modulation Theory, Detection, Estimation, and Filtering Theory is kind of publication which is giving the reader capricious experience.

Charles Wright:

People live in this new day of lifestyle always make an effort to and must have the time or they will get lot of stress from both daily life and work. So , if we ask do people have extra time, we will say absolutely sure. People is human not really a huge robot. Then we ask again, what kind of activity do you possess when the spare time coming to a person of course your answer can unlimited right. Then do you try this one, reading textbooks. It can be your alternative in spending your spare time, the book you have read is actually Detection Estimation and Modulation Theory, Detection, Estimation, and Filtering Theory.

Tamica Harris:

Playing with family in a very park, coming to see the water world or hanging out with buddies is thing that usually you could have done when you have spare time, then why you don't try point that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Detection Estimation and Modulation Theory, Detection, Estimation, and Filtering Theory, you may enjoy both. It is excellent combination right, you still want to miss it? What kind of hangout type is it? Oh can happen its mind hangout men. What? Still don't buy it, oh come on its identified as reading friends.

John Merritt:

Detection Estimation and Modulation Theory, Detection, Estimation, and Filtering Theory can be one of your beginning books that are good idea. We recommend that straight away because this book has good vocabulary that may increase your knowledge in vocab, easy to understand, bit entertaining but delivering the information. The author giving his/her effort to set every word into pleasure arrangement in writing Detection Estimation and Modulation Theory, Detection, Estimation, and Filtering Theory however doesn't forget the main level, giving the reader the hottest and also based confirm resource facts that maybe you can be among it. This great information could drawn you into completely new stage of crucial considering.
