Bridging the Gap: Philosophy, Mathematics, and Physics: Lectures on the Foundations of Science (Boston Studies in the Philosophy and History of Science) (Volume 140)

Foundational questions in logic, mathematics, computer science and physics are constant sources of epistemological debate in contemporary philosophy. To what extent is the transfinite part of mathematics completely trustworthy? Why is there a general 'malaise' concerning the logical approach to the foundations of mathematics? What is the role of symmetry in physics? Is it possible to build a coherent worldview compatible with a macroobjectivistic position and based on the quantum picture of the world? What account can be given of opinion change in the light of new evidence?

These are some of the questions discussed in this volume, which collects 14 lectures on the foundation of science given at the School of Philosophy of Science, Trieste, October 1989.

The volume will be of particular interest to any student or scholar engaged in interdisciplinary research into the foundations of science in the context of contemporary debates.

From reader reviews:

Robin Almeida:

Reading a reserve tends to be new life style with this era globalization. With reading you can get a lot of information that will give you benefit in your life. Having book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A great deal of author can inspire their particular reader with their story or even their experience. Not only the storyline that share in the books. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on earth always try to improve their proficiency in writing, they also doing some research before they write with their book. One of them is this Bridging the Gap: Philosophy, Mathematics, and Physics: Lectures on the Foundations of Science (Boston Studies in the Philosophy and History of Science) (Volume 140).

Rene Moore:

A lot of people always spent all their free time to vacation or perhaps go to the outside with them family or their friend. Were you aware? Many a lot of people spent they free time just watching TV, or playing video games all day long. In order to try to find a new activity this is look different you can read the book. It is really fun for you. If you enjoy the book which you read you can spent all day every day to reading a e-book. The book Bridging the Gap: Philosophy, Mathematics, and Physics: Lectures on the Foundations of Science (Boston Studies in the Philosophy and History of Science) (Volume 140) it is extremely good to read. There are a lot of people who recommended this book. These people were enjoying reading this book. When you did not have enough space to develop this book you can buy the actual e-book. You can m0ore easily to read this book out of your smart phone. The price is not too expensive but this book has high quality.

Kenneth Hoy:

Exactly why? Because this Bridging the Gap: Philosophy, Mathematics, and Physics: Lectures on the Foundations of Science (Boston Studies in the Philosophy and History of Science) (Volume 140) is an unordinary book that the inside of the publication waiting for you to snap that but latter it will jolt you with the secret this inside. Reading this book next to it was fantastic author who else write the book in such amazing way makes the content inside of easier to understand, entertaining method but still convey the meaning entirely. So , it is good for you because of not hesitating having this anymore or you going to regret it. This phenomenal book will give you a lot of benefits than the other book include such as help improving your expertise and your critical thinking means. So , still want to hesitate having that book? If I were being you I will go to the e-book store hurriedly.

Nancy Steffen:

Reading a guide make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is composed or printed or illustrated from each source which filled update of

news. With this modern era like now, many ways to get information are available for anyone. From media social including newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just searching for the Bridging the Gap: Philosophy, Mathematics, and Physics: Lectures on the Foundations of Science (Boston Studies in the Philosophy and History of Science) (Volume 140) when you required it?
