**Conjugate Divergent Margins (Geological Society Special Publication No. 369)** W.U. Mohriak, A. Danforth, P.J. Post, D.E. Brown, G.C. Tari, M. Nemcock, S.T. Sinha

The main focus of the book is the geological and geophysical interpretation of sedimentary basins along the South, Central and North Atlantic conjugate margins, but concepts derived from physical models, outcrop analogues and present-day margins are also discussed in some chapters. There is an encompassing description of several conjugate margins worldwide, based on recent geophysical and geological datasets. An overview of important aspects related to the geodynamic development and petroleum geology of Atlantic-type sedimentary basins is also included. Several chapters analyse genetic mechanisms and break-up processes associated with rift-phase structures and salt tectonics, providing a full description of conjugate margin basins based on deep seismic profiles and potential field methods.

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

**From reader reviews:**

**Lillie Levine:**

Reading a book tends to be new life style with this era globalization. With reading you can get a lot of information that may give you benefit in your life. With book everyone in this world can easily share their idea. Publications can also inspire a lot of people. A lot of author can inspire all their reader with their story or maybe their experience. Not only the storyplot that share in the guides. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors these days always try to improve their skill in writing, they also doing some analysis before they write on their book. One of them is this Conjugate Divergent Margins (Geological Society Special Publication No. 369).

**Douglas Barlow:**

The publication with title Conjugate Divergent Margins (Geological Society Special Publication No. 369) contains a lot of information that you can learn it. You can get a lot of benefit after read this book. This kind of book exist new know-how the information that exist in this book represented the condition of the world now. That is important to yo7u to know how the improvement of the world. This book will bring you inside new era of the the positive effect. You can read the e-book in your smart phone, so you can read the item anywhere you want.

**Judith Mandel:**

Conjugate Divergent Margins (Geological Society Special Publication No. 369) can be one of your starter books that are good idea. We all recommend that straight away because this publication has good vocabulary which could increase your knowledge in language, easy to understand, bit entertaining however delivering the information. The writer giving his/her effort to place every word into pleasure arrangement in writing Conjugate Divergent Margins (Geological Society Special Publication No. 369) nevertheless doesn't forget the main point, giving the reader the hottest and also based confirm resource information that maybe you can be certainly one of it. This great information can certainly drawn you into completely new stage of crucial thinking.

**Hayden Wolfe:**

Reading a book to become new life style in this 12 months; every people loves to examine a book. When you read a book you can get a lots of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, such us novel, comics, as well as soon. The Conjugate Divergent Margins (Geological Society Special Publication No. 369) will give you new

experience in examining a book.
