The Geology of China (Oxford Monographs on Geology and Geophysics)

Zunyi Yang, Cheng Yuqi, Wang Hongzhen

The Geology of China (Oxford Monographs on Geology and Geophysics) Zunyi Yang, Cheng Yuqi, Wang Hongzhen

The first published account in forty years, this up-to-date survey of the geology of China, written by three prominent Chinese scientists, makes available to the West a vast body of information hitherto difficult to obtain, including data gleaned from many papers and unpublished reports produced in China since 1949. The core of the book is a fourteen-chapter survey of the geological history of China, from the Archaean to the Quaternary. The book also features a consideration of igneous and metamorphic rock, and concludes with a description of the geotectonics of China. This landmark volume will be an integral part of all library collections in geology.
