Clinical Research for the Doctor of Nursing Practice is a user-friendly guide that offers DNP students a step-by-step method to implement clinically-based research. Designed specifically for DNP courses, it introduces a new, streamlined approach to research. It guides graduate students through the steps needed to complete a clinical research project by emphasizing crucial information and eliminating extraneous material. The book includes: *Learning objectives at the beginning of each chapter to highlight critical information in each chapter *Learning enhancement tools that encourage readers to think critically about the information presented and draw connections to their own research *Resources for further study throughout the book to aid students with their research *Glossaries to define new terms for the reader
