Since 1922, when Howard Carter discovered Tut's 3,000-year-old tomb, most Egyptologists have presumed that the young king died of disease, or perhaps an accident, such as a chariot fall. But what if his fate was actually much more sinister? Now, in *THE MURDER OF TUT*, James Patterson and Martin Dugard chronicle their epic quest to find out what happened to the boy-king. They comb through the evidence--X-rays, Carter's files, forensic clues--and scavenge for overlooked data to piece together the details of his life and death. The result is a true crime tale of intrigue, betrayal, and usurpation that presents a compelling case that King Tut's death was anything but natural.
