Most everyone appreciates hearing stories from the military, especially the sacrificial ones. There are thousands of military books published containing stories laced with blood, guts, and foul language. While those things are naturally a part of the military life, there remains significant numbers in society desiring to connect with that realism, yet be screened from its abrasiveness. This book's scripted narrative format parallels that concept in providing readers with quality stories of military adventure, combat, war, and perilous times in between – yet, without excessive harshness, gore, and tainted language. In the shadowy danger zones of warfare and military operations, there are times when an unseen presence watches over the sentinels of freedom. Foot Prints of Red, White, and Blue captures a few of those patriotic stories, along with a few other unusual accounts from mission assignments. Drafted mostly from the author's experiences, the stories within this book range from humorous to serious, from planned to unforeseen, from routine to the heroic, and even ricochets into the unknown realm of UFOs and extraterrestrial aliens.
