Dynamic Trading with Weekly Options Tim Haddock, Ravi Kapoor

More than a year in the top 10!

If the charts come out too small on your device just email me and I will send a link to download all illustrations, no cost, no spam.

Weekly options are getting more and more popular and are available for a wide range of stocks and ETFs. No wonder, since you have the chance to play this sector with limited capital and great returns. You have to be careful, though. Most of the expensive coaches and webinars just teach you a number of strategies but fall short in telling you how to properly apply them. Simply establishing spreads and iron condors based on the Greeks and statistics could be detrimental to your financial health. If you ever struggled to avoid the maximum loss on an iron condor you know what we mean.

We will show you with practical examples and many illustrations how to approach this market in a dynamic way. Our strategies do not require a lot of capital, keep risk under tight control and are suitable even for small and medium sized accounts. The strategies are suitable for day trading as well as swing trading. We just tell what we do and that goes beyond the mere description of some strategies as you will find elsewhere.

We will teach you also the proper way to use stop loss orders which will save you a ton of money.

There will be no invitations to costly webinars nor any sales pitch to indicators or other material.

Should your device not display the charts and illustrations correctly, just shoot us an email and we will provide you with a different access, of course without charge or spam.
