High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems)

High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems)

This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

From reader reviews:

Jessica Peacock:

The book High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems) can give more knowledge and also the precise product information about everything you want. So just why must we leave the best thing like a book High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems)? Some of you have a different opinion about reserve. But one aim this book can give many facts for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or information that you take for that, you are able to give for each other; you may share all of these. Book High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems) has simple shape however, you know: it has great and big function for you. You can seem the enormous world by available and read a e-book. So it is very wonderful.

Cathy Spearman:

Hey guys, do you wishes to finds a new book to read? May be the book with the title High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems) suitable to you? The actual book was written by popular writer in this era. The actual book untitled High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems) is a single of several books in which everyone read now. This specific book was inspired many men and women in the world. When you read this publication you will enter the new shape that you ever know just before. The author explained their thought in the simple way, so all of people can easily to comprehend the core of this book. This book will give you a wide range of information about this world now. To help you to see the represented of the world in this particular book.

Richard Riggins:

High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems) can be one of your nice books that are good idea. All of us recommend that straight away because this guide has good vocabulary that could increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The article writer giving his/her effort that will put every word into satisfaction arrangement in writing High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems) although doesn't forget the main point, giving the reader the hottest and also based confirm resource facts that maybe you can be considered one of it. This great information can drawn you into brand new stage of crucial considering.

Barbara Hall:

This High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems) is great reserve for you because the content which can be full of information for you who else always deal with world and have to make decision every minute. This kind of book reveal it info accurately

using great organize word or we can say no rambling sentences within it. So if you are read it hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but hard core information with wonderful delivering sentences. Having High Efficiency Video Coding (HEVC): Algorithms and Architectures (Integrated Circuits and Systems) in your hand like having the world in your arm, information in it is not ridiculous just one. We can say that no e-book that offer you world with ten or fifteen small right but this book already do that. So , this is certainly good reading book. Hello Mr. and Mrs. occupied do you still doubt that?
